How to pay with your LAKS Wearable

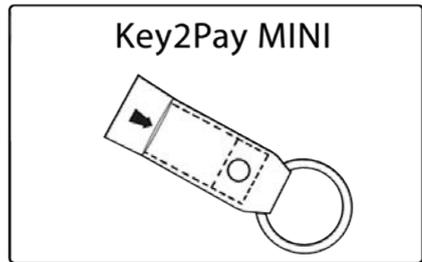

1. place the payment chip of your wearable against the active part of the terminal which is usually indicated by the contactless acceptance mark 
2. don't move your wearable away from the terminal until you see the green light or hear the beep to noting a successful transaction
3. some terminals are less sensitive than others, so you may have to move your wearable around until you find the most receptive point on the surface
4. if a terminal has a particularly low sensitivity and does not detect your wearable easily, simply remove it and hold it flat against the surface

Care Instructions for your Ring2Pay

Do not drop your Ring2Pay

Your Ring2Pay can be damaged if dropped onto a hard surface. Also, if sufficient force is applied to it. That may result in surface cracks or damage to the electronic components inside. Please treat your Ring2Pay like a piece of jewelry.

Do not wear it together with other rings!

Zirconia ceramic (ZrO_2) is extremely hard and scratch resistant however if you wear it next to another ring it can cause dark marks which are very hard to remove. Do not bring it into contact with precious stones or diamond – they will scratch it!

Avoid solvents and scouring agents

Do not use industrial abrasives they can scratch your Ring2Pay. The ring can be safely cleaned with water-based household soaps and detergents.

Avoid electromagnetic fields!

Some household electrical goods can generate EM fields strong enough to affect your ring's payment chip. Avoid leaving your ring near electrical equipment or it may stop working.

Be careful!

Please do not eat the cleaning material and clean your hands after usage. Keep away from children. Cleaning agent for rings with light colours.

LAKS

Lucas Alexander Karl Scheybal, CEO LAKS in Austria, is the founder of LAKS which had been established in 1986.

He started painting pictures and composing music at a very early age and studied economy. Since the beginning he discovered his great interest in new technologies and industrial design. As a solution-oriented person, he loves challenges in a development process. LAKS Pay was born. LAKS is managed as a genuine family-run Austrian company and today more than ever, has its finger on the pulse of time. Each wearable is developed and designed with passion and perfection.
